## SUMMARY

Sound, music, filmmaking and storytelling have been passions for my entire life and I have a breadth of technical and artistic knowledge which I am eager to bring to new projects and collaborations. I learned how to record and mix at a young age and have worked on indie films, commercials, albums, podcasts, mini-docs, websites, music videos, social media campaigns and web series. When my colleagues run into technical challenges or seek advice, I am often their first call.

## EXPERIENCE
